FR SKATES

by Sebastian Laffargue

The **FR skates** concept was born in 2006, in Paris, France.
Its creators, Sébastien Laffargue & Grégoire Pinto were looking for a new generation of Freeride skates with hard shells, combining high performance, comfort, versatility, and durability.

Their attention to each detail, combined with a drop of French Touch, made these skates a huge success around the world.

The time has come for FR to take off, to keep in line with its roots, and guide you through new ways, for the best skating experiences.
FR products and innovations are already setting tomorrow's new standards.
Join the FR brand in a new era!
